

Operate Your EAM on AWS

A complete enterprise asset
management solution

FuseForward delivers fully managed Enterprise Asset Management (EAM) solutions on AWS.

We integrate EAM software with other services, including smart meters, to create a comprehensive solution that meets customer's needs. Our customers also benefit from access to additional AWS services, including AI and machine learning.

With an EAM cloud solution, everything works together—real-time alerts will help you reduce downtime and increase efficiency. Work orders can be immediately sent to the affected sector, facilitating a rapid response.

“

“We required a secure, high-performance cloud solution. FuseForward not only successfully delivered a cloud environment that met our needs, they have acted as a true partner.” - Sean Dunphy, Vice President, Sales & Marketing, Advanced Utility Systems

- IBM Maximo specialists
- Secure cloud environments
- Complete managed services and technology solutions
- Seamless transitions
- Integrations with GIS, SCADA, and IoT data
- Field automations to help streamline operations

Benefits

Faster

Templates and automation cut project delivery timelines by 20%.

Cost-effective

We promise price certainty with your annual subscription.

Host anywhere

We offer customers the option to host where it suits them, including AWS.

Fully-managed

We maintain your cloud EAM solution so you can concentrate on what matters.

Industry expertise

We have experience delivering major EAM implementations and cloud solutions.

Flexibility

Deployed in a single-tenant environment to enable full application customization.

Our Solution

Our specialists will work with you to create a custom package based upon the number and type of users, as well as other system requirements. FuseForward fully manages the AWS infrastructure, with an option for shared responsibility.

Supporting the operation of all EAM systems including:

- IBM Maximo
- Infor
- ESRI
- Autodesk

We promise

- ✓ Full compliance, full integration, full functionality
- ✓ Quick deployments
- ✓ Multiple environments
- ✓ Java virtual machine clusters with support for MS SQL or Oracle databases
- ✓ Supported by FuseForward Cloud Suite on AWS, including security, management, and analytics

How to Get Started

It's easy – just make contact via email or phone for a free consultation. We'll assess your requirements and recommend one of our packages. We will then work with your EAM software provider (including Maximo) to create a custom solution on AWS that meets all user and compliance requirements.

About FuseForward

FuseForward accelerates digital transformation for critical service providers including utilities, cities, education and healthcare providers. FuseForward is an Advanced Partner in the Amazon Web Services (AWS) Partner Network (APN) that provides secure cloud environments, managed services and technology solutions for public sector and enterprise customers.
